

## EBX / Java Development

Butos AG are distribution- and integrations partner of Orchestra Networks, EBX Solutions for Switzerland (Wettingen). We use the Suite EBX for **Master Data Management** (MDM). The topic of data management is becoming increasingly important as a result of digitization and cost savings for our customers. Digital Transformation, Data Management and Compliance are major topics in today's market.

EBX is one of two leaders in Gartner Magic Quadrant for multiple domain MDM solutions. The complete topics focus on Master- and Reference Data Management and Meta Data.

Our MDM projects are about:

Customer guidance, typical business analysis topics, project management, data modeling, EBX customization, Java API development, integration architectures etc..

In the context of master data management we are looking for excellent technical experts for customer integration of the master data suite EBX, who are used to work in an Enterprise environment. This position is a hands-on role with primary focus on design, customizing and development of complex business functionality. You should have strong passion for developing quality code and deep understanding of core concepts of Java technologies.

### Skills as Java - EBX developer/specialist:

- Expert in Java/J2EE
  - Set up a development environment (on Premis and in Cloud, Maven, Jira, confluence, Bitbucket, Azure ...)
  - Data integration in EBX (Webservice, ESB, XML, Erfahrungen mit Integrationslösungen ...)
  - Work with Java API von EBX
  - Are experienced in Maven/Bitbucket /Cloud and Java Tools/Werkzeuge, e.g. J2EE,
  - Definition and discussion of integration architectures in the customer environment by customer
  - Good Java skills and development skills (speed and quality awareness)
  - Data modeling
  - architectural understanding
  - Customization skills
  - Consultant skills
  - Are a Team Player
  - English and German
-

**Butos:**

- Provides in-house training for EBX
- Offers exciting work in enterprise projects
- Provides the possibility to work in the smart, product team
- Uses latest MDM technology
- Promotes education
- Enables innovation
- Maintains the team spirit

**Job:**

- Freelance as well as employee is possible
- In a very motivated and cooperative team
- Project durations are between 3-12 months
- Most of the projects are based in Switzerland
- Working by customer, remotely or in-house is depending on customer requirement.

If you are willing to work on promising projects and inspired from data topics, please send your CV and contact us.
