

MDM (Master Data Management) Expert

Master data management (MDM) is a technology-enabled discipline in which business and IT work together to ensure the uniformity, accuracy, stewardship, semantic consistency and accountability of the enterprise's official shared master data assets. Master data is the consistent and uniform set of identifiers and extended attributes that describes the core entities of the enterprise including customers, prospects, citizens, suppliers, sites, hierarchies and chart of accounts.

Context of the job:

- Implementation projects for EBX5 of Orchestra Networks in the role of the MDM Expert in Switzerland, Germany or Austria
- Contract in T&M (Time and Material) as Contractor for the given customer project. Later a move from self-employed to employed is possible

JOB DESCRIPTION Mission/ Objectives

As part of the Swiss Professional Services team, you will liaise directly with new and existing customers in a project environment. Your primary focus will be implementing the Orchestra Networks solution EBX. You will be accountable for supporting the project team in the analysis of customer requirements, for defining and documenting the customer specific solution, design and for configuring EBX5 Master Data software in order to meet the agreed customer requirements.

Key Activities

- You will represent Butos in a consultancy role in relation to assigned implementation projects.
- You will ensure a cohesive and structured approach to the analysis of customer requirements and the definition of EBX5 solutions in line with agreed requirements as well as EBX5 Systems' implementation methodology.
- You will provide written documentation; defining customer requirements and the resultant EBX5 configuration to address those requirements. You will identify the need for organization impact and appropriately include these details in the project plans subject to approval.
- Where appropriate, you will liaise with Solution Architects, Research and Development and Technology to define customized solutions and integrations to meet specific customer needs.
- Configure the EBX5 application in line with the documented solution design.
- You will analyse customer business needs and data needs and propose appropriate EBX5 configuration solutions.

- You will design and implement business solutions jointly bringing added value to the customer.
- You will perform problem analysis and resolution activities.
- You will support customer end-to-end testing prior to go live.
- You will actively participate and contribute to customer project meetings.

Skills required

- You are skilled in one of more of the following areas: e-commerce solutions, Retail, IT Finance, Insurance solutions, Product Information Management (PIM), Master Data Management (MDM), ERP, CRM, BI technologies
- Good communication, analysis, documentation, customer service and time management skills.
- Ability to learn on the fly, make quick decisions and recommendations. Reflect on learnings and provide compelling solutions for improvement.
- Ability and Know How of data modelling and management,
- Understanding of Reporting, ETL-and DWH-Technologies
- Consulting experience
- Technical understanding, able to understand Java coding
- Communication and writing in German and English

What Butos offer you

- Free Education for getting the expert in MDM with EBX
- Integration in the Butos EBX Team for discussions and Support
- Good social coverage
- Fair and attractive hourly rates
- Butos projects for EBX
- Potential to learn and understand other business and technical areas
- Working with a product which is ranked in Gartner as leader
- Working in an Area which accelerates due to the digitalisation trend
